Dunnage

dun-nage, noun, nautical term used to describe loose rags, mats, brushwood etc. packed around cargo to keep it from shifting, dry and undamaged (origin unknown)

CP Products has specialized in the production of dunnage, not the nautical kind, but the practical kind – plastic! The backbone to CP Products dunnage design and manufacturing is the aggregation of 30 years of part-specific packaging knowledge focused on results and customer satisfaction.

Industries Served

Yours, Automotive, Communications, Fiber Optics, Distribution, Electronics, PCB Manufacturing, Aerospace, Metal Stamping, Component Manufacturing

Touching all forms of packaging, dunnage is used to create product specific cavities to maximize protection and shipping density. Returnable dunnage can reduce packaging costs by as much as 70% over the life of the package, in many cases, paying for itself within months of the purchase.

Substrates Converted

Your Requirement, PVC, Styrene, HDPE, ABS, Poly-Carbonate, Lexan, PETG, Poly-Propylene

Formed dunnage provides intricate part protection and orientation, unavailable in other forms of packaging at reasonable startup costs. Forming as thin as .015" PVC through .500" HDPE, CP Products can handle concept through completion for all forms of dunnage, including static sensitive issues.

CP Products, a Certified, Woman Owned, Small Business
